RoboLLM / Elexhub - camera calibration

A4 landscape | 7 x 5 squares | square 30 mm | marker 22 mm | DICT_5X5_100

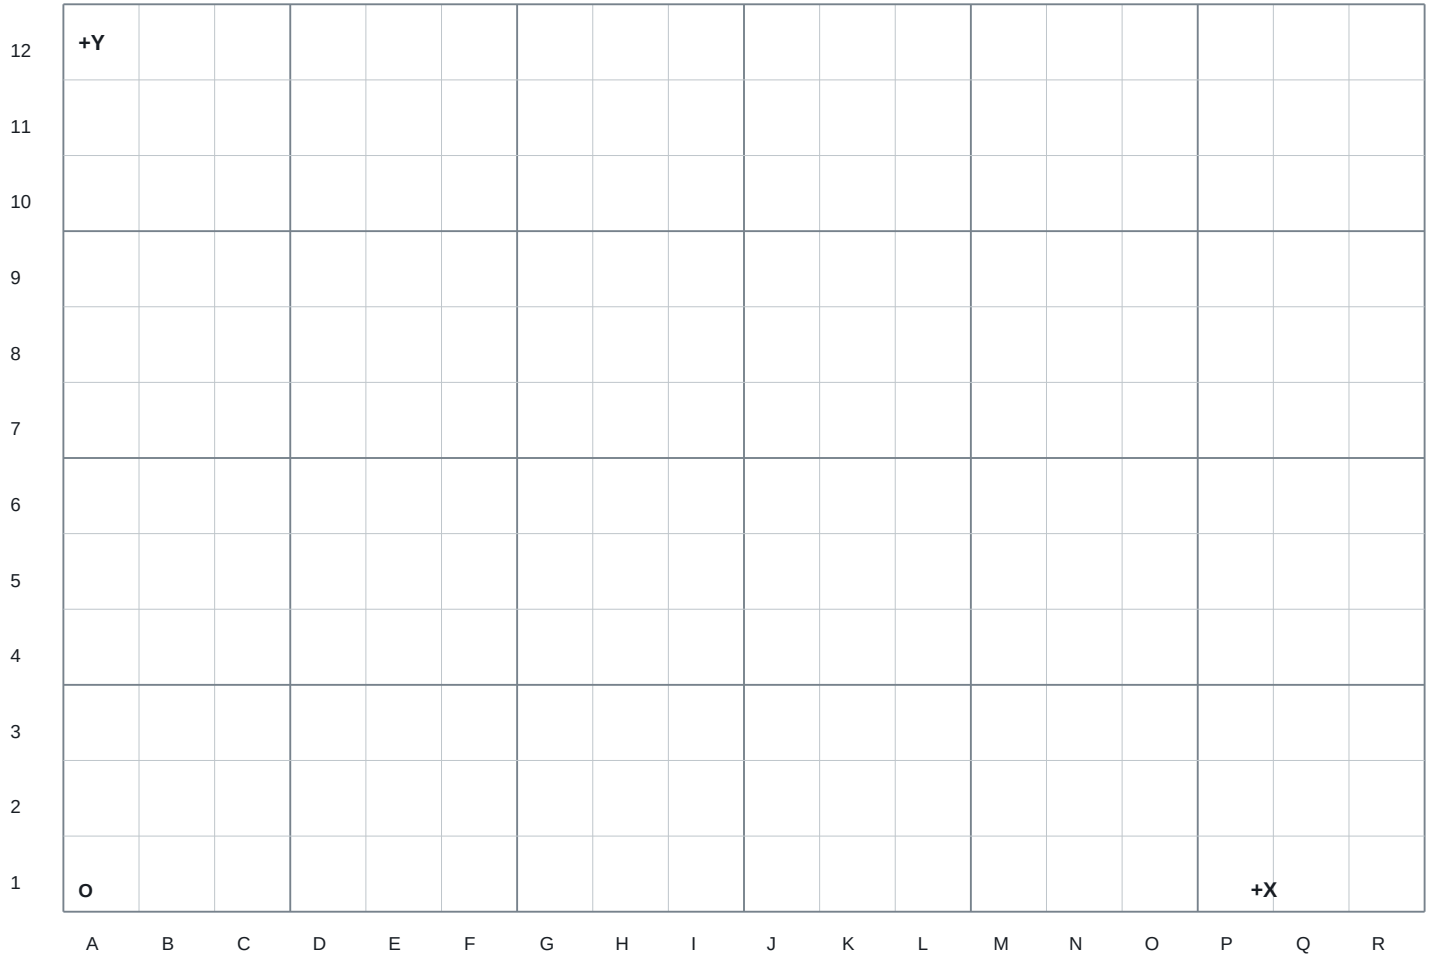

100 mm - verify with a ruler

PRINT AT 100% / ACTUAL SIZE. Disable fit-to-page. Keep flat; measure a square before calibration.

RoboLLM / Elexhub - tabletop coordinates

180 x 120 mm workspace | 10 mm grid | +Z above the paper

100 mm - verify with a ruler

Print actual size. Register this origin to the robot base before motion.

RoboLLM / Elexhub - tool and object markers

Cut with a white border. Measure the black marker edge; store the marker-to-tool offset.

Tool marker: ID 60 / black edge 20 mm

Attach to a rigid, visible bracket. Recalibrate if it moves.

Object marker: ID 70 / black edge 15 mm

Optional marker-first box pose. Record its placement on the box.

These IDs are distinct from the workspace and camera-calibration boards.

100 mm - verify with a ruler
